Welcome to LESTECH!

The leading fair for the wood processing industry in Slovenia. Lestech was first organised in 2018 as a response to the lack of opportunities for woodworking professionals to present themselves to the target public. Lestech is an independent professional event offering the key players in the field the opportunity to present novelties and meet with business partners. After the very successful first edition of the fair, we were planning an even better and larger one in April 2020, but unfortunately, our plans were thwarted by the pandemic. Although we had everything prepared for the fair, the doors of the showground were closed for a long year and a half. Nevertheless, we took advantage of the difficult situation and thought thoroughly about the direction we wanted our fairs to go. This has given us an additional boost and plenty of fresh ideas for the coming Lestech.

We are happy to announce that Lestech is coming back to the Celje Showground from 11 to 13 May 2022. It is intended for all wood processors and woodworkers, who will be able to become acquainted with novelties and solutions in the field of woodworking machinery and technologies and intermediate goods among a wide range of exhibitors and a diverse side events programme. Make sure that you, too, are a part of the central woodworking fair in Slovenia!

Kindest regards,
mag. Robert Otorepec
Executive Director of
Celjski sejem d. d
